

CASTLET

ENGINEERING SOLUTIONS

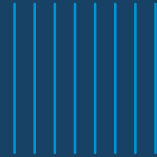

Connecting clients with bespoke engineering solutions **for over 50 years**

At Castlet, we pride ourselves on delivering exceptional power, control and automation solutions that exceed industry standards. Our expert team has unrivalled experience in engineering solutions for industrial air pollution management, and electro-mechanical and electronic design for the military.

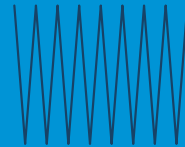

Whether it's through consultancy, system design, software and hardware development, manufacturing, installation services or maintenance, we deliver electrostatic precipitator (ESP) power and control, high power, control and automation, and aerospace, marine and defence solutions that make a real difference to your business.

With five decades of experience, our experts have built a reputation for delivering reliable, efficient and precise services that help your systems perform at their best, even in the most demanding environments. We have a worldwide network of partners who provide localised support, delivering a bespoke solution to suit your needs. Whether you need an emergency callout or remote engineering assessment, we'll be there!

Discover how we can solve your engineering challenges.

Electrostatic Precipitator Power & Control

Castlet electrostatic precipitator power and control solutions deliver an industry-leading solution to air pollution management. Built upon 50 years of engineering expertise and controlled by the industry-leading MCS III controller family, our range of ESP power and control products are here to enhance your plant's pollution and particulate control.

How does it work?

Our ESP power and control products are used to filter and control outputs in a number of different industries, from fossil fuel generation to cement and glass manufacturing. Our engineers will work with you to provide a comprehensive design service to deliver turnkey systems. We can provide stable and controlled environments to enhance efficiency and reliability in your high voltage applications and deliver retrofitting to ensure system longevity.

High Power, Control & Automation Systems

We are experts in delivering bespoke, agile and intricate high power, control and automation applications. Working in a range of industries and markets, we're here to deliver the best solution for your business.

What do you need to know?

Our team of expert engineers provide industry-leading technology and solutions for each of our clients. From containerised switch rooms to PLC and MCCs, the range of engineering solutions we provide are comprehensive and intricately designed, built and delivered to suit your needs.

Aerospace, Marine & Defence Solutions

Our expertise in the military, aerospace and defence sectors is unmatched, built upon years of research, development, testing and production, and paired with a problem-solving attitude, we have provided many solutions for the industry.

How can we help you?

Our team of engineers specialise in electro-mechanical and high-tech electronic equipment, prototype equipment to commercial production. We utilise the latest 3D modelling packages to ensure designs are compliant at an early stage in the design cycle, and have extensive experience in post design services, Nato Codification, key spares sourcing and obsolescence management.
